# PRATIK PATIL

Nagpur, India | +91 7666634184 | pratikpatil2003.12.24@gmail.com | linkedin.com/in/pratik-patil-015b39254 | github.com/Pratik24122

## PROFESSIONAL SUMMARY

Software engineer with hands-on experience building and maintaining backend services in Java and Spring Boot in an enterprise delivery environment at HCLTech. Comfortable designing RESTful APIs, working with relational databases via JPA/Hibernate, and writing unit and integration tests. Strong fundamentals in OOP and design patterns, with additional experience in Python and data-driven systems.

## TECHNICAL SKILLS

**Languages:** Java (8/11/17), Python, SQL
**Frameworks:** Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate, JUnit, Mockito
**Architecture & APIs:** RESTful API design, Microservices, MVC, OOP, Design Patterns, Exception Handling, Layered Architecture
**Messaging:** Apache Kafka
**Databases:** MySQL, PostgreSQL, SQLite, Oracle SQL; query optimisation, schema design, ORM mapping
**Tools:** Maven, Git, GitHub, Postman, Swagger/OpenAPI, IntelliJ IDEA, Linux
**Other:** Pandas, NumPy, Power BI

## PROFESSIONAL EXPERIENCE

**HCLTech** **Oct 2025 – Present**
*Graduate Engineer Trainee — Java / Spring Boot Developer* *Nagpur, India*

- Develop and maintain backend microservices using Java and Spring Boot, implementing RESTful APIs consumed by internal and client-facing applications.
- Build data-access layers with Spring Data JPA and Hibernate against relational databases, including entity mapping, repository queries, and transaction handling.
- Write unit and integration tests with JUnit and Mockito, and validate API contracts using Postman and Swagger before handoff to QA.
- Collaborate with senior engineers through code reviews and design discussions, and track work items through to defect resolution.
- Debug and resolve production and pre-production issues by analysing application logs and tracing request flows across service layers.
- Selected for the internal HCLTech AIRENA 2.0 hackathon as part of the "Echo Sparks" team, building a SharePoint-integrated enterprise chatbot in Python.

## PROJECTS

**Rice Mill Management System — Full-Stack Web Application**

- Designed and built an end-to-end inventory and production management system for a rice milling business, covering procurement, processing, and dispatch workflows.
- Modelled the domain with a normalised relational schema and implemented REST endpoints for CRUD, filtering, and reporting.
- Implemented domain-specific logic including weight-unit conversion and paddy-to-rice yield tracking, with server-side validation of business rules.
- Built a responsive React + Tailwind front end consuming a Spring Boot REST API backed by relational persistence.

**Expense Tracker REST API — Spring Boot**

- Built a RESTful expense management API in Java and Spring Boot, supporting user registration, category management, and expense CRUD operations.
- Modelled entities with Spring Data JPA and Hibernate over MySQL, using repository queries, pagination, and sorting for expense listings and monthly summaries.
- Secured endpoints with Spring Security and JWT-based authentication, and applied a global exception handler for consistent error responses.
- Structured the codebase into controller, service, and repository layers with DTO mapping; covered service logic with JUnit and Mockito tests and documented endpoints in Swagger.

## EDUCATION

**B.Tech in Artificial Intelligence** **[Year of Graduation]**
*J D College of Engineering and Management, Nagpur* *CGPA: 8.95 / 10*

## CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300)
- Microsoft Certified: Azure Administrator (AZ-104)
